EXHÍBÍO®

Dynamic Digital Signage

M-Series
Multimedia Player

The Exhibio M-Series Multimedia Player is a sleek and powerful device for the creation and display of digital signs. The M-Series enables anyone to create multiple pages using a combination of text, web pages, and multimedia, and then arrange them into a playlist. Easily show video, pictures, RSS feeds, HTML, Flash, and database integrated content on your displays.

Using Exhibio's exclusive content management system, users of any skill level can have a display up and running in minutes. Its web-based interface means users can update their signs from any computer with Internet access! M-Series also supports a wide range of resolutions in both landscape and portrait modes, giving clients the flexibility to use the device with displays of all sizes.

Multimedia Capabilities

Easily incorporate any of
the following into your sign.

STREAMING MEDIA
Play real-time video and audio content.

AUDIO
Play MP3, WAV, AIF or WMA files.

IMAGES
Display BMP, GIF, JPG, or PNG Files.

TEXT
Sharp, crystal clear text, placed anywhere on the digital sign.

DATA-DRIVEN CONTENT
Pull live data from SQL servers, phone switches and more.

RSS FEEDS
Keep your viewers up to date with RSS news from all over the world

VIDEO
Play any DVDs, MPEG, WMV, MOV or AVI movie, and really catch eyes.

FLASH
Play any flash video or .swf file.

SCROLLING CONTENT
Scroll content vertically or horizontally. Make your messages mobile.

WEB PAGES
Bring in live websites to display real-time web-based information.
