Exhibio's X-Series Digital Signage Engine enables clients to create engaging and dynamic digital signs. It is the industry's easiest digital signage system to install and operate.

The X-Series features Exhibio's exclusive web-based Digital Signage Management System (DSMS) and display control system in a single compact device. The extensive design capabilities of the DSMS allow you to create signs using multiple zones, rich in media and content, for a variety of applications. Exhibio's X-Series makes creating an attractive and dynamic sign easier than ever before!

Multimedia Capabilities

Easily incorporate any of the following into your sign.

AUDIO
Play MP3, WAV, AIF or WMA files.

IMAGES
Display large or small BMP, GIF, JPG, or PNG Files.

STREAMING MEDIA
Play real-time video and audio content.

DATA-DRIVEN CONTENT
Pull live data from SQL servers, phone switches and more.

LIVE HDTV
Play live HDTV and even schedule channel changes.

TEXT
Sharp, crystal clear text, placed anywhere on the digital sign.

EMERGENCY ALERTS
Easily communicate urgent messages on your display.

RSS FEEDS
Keep your viewers up to date with RSS news from all over the wordl.

VIDEO
Play any DVDs, MPEG, WMV, MOV or AVI movie, and really catch eyes.

FLASH
Play any flash video or .swf file.

SCROLLING CONTENT
Scroll content vertically or horizontally. Make your messages mobile.

WEB PAGES
Bring in live websites to display real-time web-based information.

Just 3 Easy Steps!

**Design**   **Compose**   **Display**

Both technical and non-technical users can create sophisticated digital signage through our easy to use web-based interface
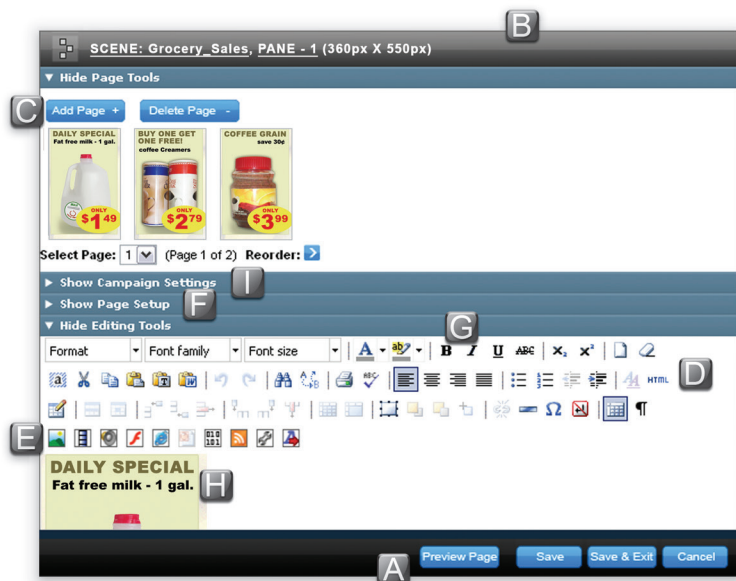

1 Design

Choose from several predefined themes or build your own using a custom background and font selection. The X-Series also includes 45 zone layouts and a Layout Creator.
2 Compose

A. Preview current page
B. Display resolution
C. Add multiple pages
D. Insert HTML
E. Insert multimedia files, HD TV, DVD, websites, scripts, scrolling text, RSS feeds, and RS232 commands.
F. Change default settings
G. Font toolbar
H. Exhibio Canvas
I. Setup an ad campaign

3 Display

Schedule scenes and playlists. Your custom content is viewable on every display connected to the X-Series unit.

X-Series Features

Exhibio Manager – The X-Series' intuitive web-based interface enables users to produce high quality, attractive signs. Accessed via a web browser, simply upload files, edit content, and schedule scenes to play in just minutes!

Multiple Zones - Screens are divided into several zones, making it easy to rotate content within selected areas of the sign. Select from one of 45 existing zone layouts or create a custom layout.
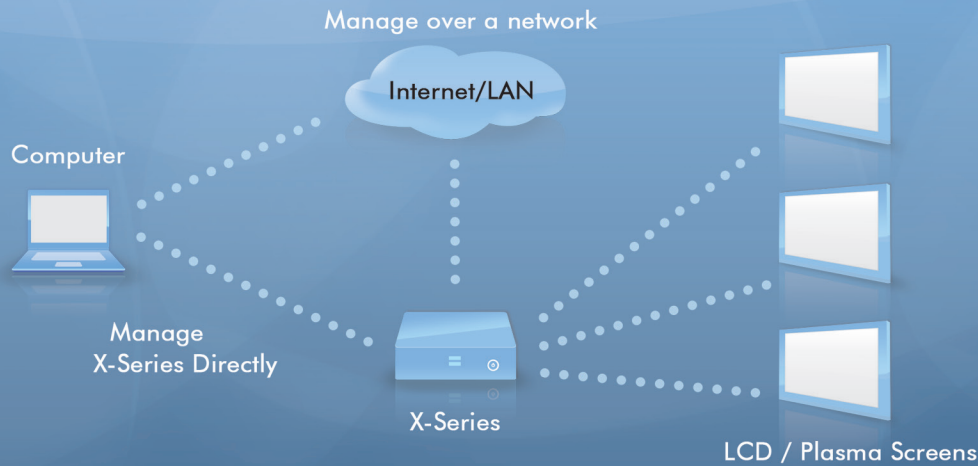

Mixed Media -The X-Series can display a mixture of live web pages, images, text, Flash, HTML, PowerPoint, RSS feeds, scrolling text, audio, and video.

Advanced Scheduling - Schedule scenes and playlists to run once or on a recurring basis. Flexible options for recurring scenes make scheduling quick and easy.
